9. Read the conversation between William Morris and the Young Lady, and complete the paragraph that follows.
William Morris: Madam, did you accidentally drop a ring in your pocket?
Young Lady: I don't know what you are talking about. I only came to repair my brooch.
William Morris: Please hand over the antique flower ring quietly before I call Mr. Regnier.
Young Lady: Alright, take it and let me go.
Complete the Paragraph:
William Morris politely asked the young lady (a) _____.
The young lady replied defensively that (b) _____ and added that (c) _____.
Morris then requested her (d) _____ before he called Mr. Regnier.
Finally, the lady agreed and asked him (e) _____.

MATHS

1) Chapter:- Polynomial
Solve Worksheet 3 and Brain Teasers of chapter 8 (Polynomial).

SCIENCE

Chapters: Synthetic Fibres and Plastics & Reproduction in Animals
Homework Assignment
A. Objective-Type Questions

Q1. Fill in the blanks.
a) The first fully synthetic fibre developed by humans was ____.
b) Synthetic fibres are made up of long chains of repeating units called ____.
c) Plastics that can be softened and moulded repeatedly on heating are called ____.
d) The fusion of male and female gametes is known as ____.
e) The development of an embryo outside the mother's body takes place in ____ fertilisation.

Q2. Identify the following.
a) A synthetic fibre commonly used for making ropes, parachutes and seat belts.
b) A type of plastic used for making electrical switches and saucepan handles.
c) The process by which a tadpole develops into an adult frog.
d) The type of reproduction in which only one parent is involved.

Q3. Correct the following statements.
a) All synthetic fibres are biodegradable.
b) Thermosetting plastics can be melted and remoulded repeatedly.
c) Fertilisation in human beings takes place outside the female body.
d) Amoeba reproduces by budding.
B. Application-Based Questions

Q4. Riya prefers wearing nylon clothes during summer because they are lightweight and dry quickly. Do you think nylon is a suitable choice for hot weather? Give two scientific reasons.

Q5. A shopkeeper uses plastic bags to pack hot food items. Explain why this practice may be harmful and suggest a safer alternative.

Q6. A student notices that plastic bottles can be reshaped on heating, whereas electrical switches cannot. Explain the difference in their properties.

Q7. A hen lays several eggs, while a cow gives birth to a calf. Explain the difference between these two modes of reproduction.

Q8. Fish and frogs release a large number of eggs, whereas human beings usually produce one baby at a time. Why do these animals produce so many eggs?
C. Higher-Order Thinking Questions

Q9. If all synthetic fibres and plastics suddenly disappeared from the world, how would our daily lives be affected? Mention three advantages and two difficulties.

Q10. Creative Activity – Choose Any One:
a) Design a poster on "Say No to Single-Use Plastics", highlighting three environmentally friendly alternatives.
OR
b) Draw a labelled flowchart showing the stages of development from fertilisation to the formation of a baby in human beings.
Instructions: Complete Questions 1–9 neatly in your Science homework notebook. Attempt any one activity from Question 10 on an A4 sheet. Give scientific explanations and suitable examples wherever necessary.

SOCIAL SCIENCE

Answer the following questions:
1. What were the proposals of Wood's Despatch of 1854?
2. Differentiate between the Anglicist and the Orientalist.
3. Do you think that the British system of education had a negative impact on the people of India? Support your answer with suitable arguments.
4. State the impact of the reform movements on India.
5. On an outline political map of India show the leading producer states of the following crops-
a) Rice b) Wheat
c) Cotton d) Jute
e) Tea f) Coffee
